Subject: **BCD NewsFlash**

Hello.

To be sure that you receive your BCD communications, please add newsletter@abecsw.org to your email address book or whitelist.

Thanks!

With the growth of the Internet, there has been a conspicuous rise in unsolicited commercial email (spam) filling people's inboxes with unwanted email messages. In order to combat this rising problem, many Internet Service Providers (ISPs, such as AOL, Earthlink, etc) and corporations have implemented a variety of filters and blocking software to stop the unwanted emails from cluttering users' inboxes. But, many of these filtering efforts incorrectly classify legitimate and valuable emails, such as the BCD News Flash, as unsolicited or bulk mail, and therefore filter them out before allowing them to arrive in your inbox.
