Subject: **BCD NewsFlash coming soon...**

We asked once before, but we'd like to ask again...

We have news to send you, about discounts on liability insurance, EAPs, a Working with Children credential, on-line CEs, and EAP services. To have the best chance of receiving your BCD newsletter, we ask that you add newsletter@abecsw.org to your email address book, if you haven't already.

Thanks!

With the growth of the Internet, there has been a conspicuous rise in unsolicited commercial email (spam) filling people's inboxes with unwanted email messages. In order to combat this rising problem, many Internet Service Providers (ISPs, such as AOL, Earthlink, etc) and corporations have implemented a variety of filters and blocking software to stop the unwanted emails from cluttering users' inboxes. But, many of these filtering efforts incorrectly classify legitimate and valuable emails, such as the BCD News Flash, as unsolicited or bulk mail, and therefore filter them out before allowing them to arrive in your inbox.
