SEEKING CRISIS RESPONSE PROFESSIONALS NATIONWIDE TO CONTRACT WITH  
CRISIS CARE NETWORK

**You are being sent this email because, as a Board Certified Diplomate with ABE, you have already met rigorous standards for practice and experience.**

Crisis Care Network is the leading provider of critical incident response services to business and industry settings. We help individuals and organizations recover from critical incidents such as robberies, workplace fatalities, loss of life, catastrophic accidents and disasters. When tragedy strikes, Crisis Care Network often receives the first call for help. Over 600 times per month this call comes from EAP's, insurers, and employers in communities like yours.

We are proud to partner with a nationwide network of master's and doctoral level clinicians trained as critical incident response Specialists. Recognizing the vital role that our Specialists play, we are dedicated to supporting, training and serving them when they are called upon to deliver services.

This is not ordinary work. It is work that changes lives, restores hope and renews vision for tomorrow. It is work that calls for commitment and excellence. Joining our network will position you to serve your community when it needs you the most.

Specialists in our network must possess:

- A graduate degree in a behavioral health field
- Current licensure and/or certification to practice independently
- Demonstrated training in a phasic, multi-component approach to critical incident response such as that provided by CCN, the Red Cross, ICISF, and FEMA
- Professional liability insurance in the amounts of 1/3 million

If you are interested in joining our network, please contact us via email at [network@crisiscare.com](mailto:network@crisiscare.com) or by phone at 1.888.736.0911 x877

There is no greater honor and no greater responsibility than to be there on the worst day of someone's life. Join us and make a difference in the lives of those impacted by trauma.

Sincerely,

Bob VandePol, MSW  
President  
Crisis Care Network

Samuel Jenkins  
Network Development Coordinator  
Crisis Care Network
